

Retail Inventory and Replenishment Policy

Synthetic CPG/Retail dataset for educational RAG projects.

Inventory Rules

Each SKU has a reorder point based on expected demand, supplier lead time and safety stock.

A replenishment request should be created when available stock falls below the reorder point.

Fast-moving SKUs should be reviewed daily, while slower-moving products may be reviewed weekly.

SKU Inventory Parameters

SKU	Product	Current Stock	Reorder Point	Reorder Qty	Lead Time
BEV001	Coca-Cola 500 ml	180	200	500	3 days
