

Retail Store Operations Guide

Synthetic CPG/Retail dataset for educational RAG projects.

Daily Store Process

Opening staff should verify cash procedures, POS availability and critical inventory alerts.

Receiving staff should compare delivered quantities against the purchase order and delivery document.

Damaged cartons should be separated from saleable inventory and recorded in the inventory system.

At closing, store teams should reconcile sales transactions and inventory exceptions.

Merchandising Guidelines

Fast-moving products should be placed in high-visibility areas where practical.

Products with shorter shelf life should follow first-expiry-first-out handling.

Promotional displays should clearly show the offer conditions and validity dates.

Customer Service

Staff should verify the invoice before initiating a return.

Customers should receive clear information about return eligibility and refund timelines.

Escalated complaints should include order number, SKU, issue description and supporting evidence.
